and carbine hook.

GORE-TEX®

For tough and demanding environments – comfortable and lightweight. Designed with focus on ergonomics, weight and comfort – without compromise

- Ergonomic – pre-shaped construction with 100% freedom of movement
- Breathability – durable fabrics with highly breathable properties from GoreTex
- Lightweight – made as a shell product to reduce weight
- Ventilation – pit-zips (underarm-zips) to enhance ventilation in controlled situations
- Waterproof zip in neck seal for easy donning and comfort
- Pockets – roomy pockets constructed with mesh to enhance the breathable properties of the fabric, placed to ensure ease of access
- For easy integration with safety equipment such as harness and/or SeaLion lifejacket, the suit is “clean” on both chest and back
- The suit fulfills the requirements of the IMO/Solas LSA code, and ISO 15027-1 as a 1 hour immersion/quick donning suit (without lining)
- SeaWind fullfills the requirement for a Class B-suit (4 hours thermal protection) in ISO15027 and ETSO regulations (when used with lining)

PROTECTION**

«SeaWind» breaks new barriers

Triple Certification

SeaWind has been certified by SOLAS, ISO and EASA. As such it has been approved for most any demanding work situation. No other survival suit can claim to be suitable for such a wide range of applications as SeaWind.

Hansen Protection has worked relentlessly for a long time to be able to be the first to offer a survival suit that is approved for work, shipping and helicopter transport. To achieve the helicopter transport approval the company has had to fit the suit with a lining, and it has to be worn with a SeaLion Europe lifejacket.

Emergency Breathing System

The SeaAir EBS Emergency Breathing System is integrated in the SeaLion Europe lifejacket. This system makes it possible to start breathing under water, something that was not possible with previous systems. In addition, the suit is equipped with a floating buddy line hook, which is a feature unique to Hansen Protection.

Its many details, great flexibility and wide range of applications makes this Norwegian made suit from Hansen Protection the first choice for many occupational groups and professionals, not least for use in the demanding conditions that is part of the service and maintenance of wind turbines.

Trippel godkjenning

SeaWind har sertifisering fra SOLAS, ISO og EASA. Den er dermed godkjent for de fleste krevende arbeidssituasjoner. Ingen andre redningsdrakter kan vise til så stor bredde i bruksområder som nye SeaWind.

Hansen Protection har arbeidet lenge for å kunne tilby markedet en redningsdrakt godkjent både for arbeid, shipping og helikoptertransport. For å sikre helikoptertransport-godkjenningen har produsenten utstyrt drakten med fôr, og den må benyttes med redningsvesten SeaLion Europe.

Nødpustesystem

Nødpustesystemet SeaAir EBS er integrert i redningsvesten SeaLion Europe. Systemet gjør det mulig å starte pusting under vann, i motsetning til tidligere nødpustesystem som ikke tillot dette. I tillegg har drakten flytende kamerakrok, noe Hansen Protection er alene om på sine drakter.

Mange detaljer, stor fleksibilitet og bredt bruksområde gjør den norskproduserte drakten fra Hansen Protection til et førstevalg for flere yrkesgrupper, ikke minst for krevende arbeid med service og vedlikehold på vindmøller.
