# SeaAir Europe - Offshore helicopter passenger safety concept

- EASA ETSO approved immersion suit and lifejacket with EBS
- 4 h – thermal protection
- HP SeaAir Europe concept designed for passenger (& pilot) comfort and safety in over water flights with helicopter. The design is focused on a construction with ease of movement and light weight.
- The suit is designed to work in conjunction with compatible SeaLion Europe Lifejacket. The two products form a complete safety system for helicopter passengers flying offshore.

### SeaAir EUROPE COLOURS: 300 Yellow SIZES: XS – 3XL

- The suit consists of an outer shell and a thermal lining in highly flame retardant fabrics
- Soft and FR GoreTex Nomex III outershell for safety and comfort
- Available with round and vertical zip versions
- Vertical, soft PU zip (Tizip MasterSeal)
- Soft and highly elastic neoprene closures combining comfort and watertightness
- Feet in main fabric open for choice of footwear/boots
- Cargo pockets on knees and sleeves with room for hood and gloves in addition to personal belongings
- Sizes ranging from XS to 3XL fits 99% of all travellers
- Thermal zip-in lining in highly fire resistant Aramid fibres.
- Silver+ treatment for extra microbiological protection
- SeaAir Europe Suit is approved according to EASA ETSO 2C-503 standard
