

LIFE
PRO 50

ISO 12402-5:2006 Buoyancy aid (50N)

Ergonomic and practical work vest (50N) for use on fishing boats and fish farms

SeaLife PRO 50 is specially designed for continuous wear, for anyone that needs to have on a floatation vest throughout their daily work. The vest is ergonomically designed. It uses a special perforated, thin, lightweight foam which is extremely buoyant and formed into articulated sections to provide excellent movability and improved ventilation. The combination of its many practical details makes it a very comfortable and functional work vest.
