

OMS Slipstream Fins

Reference# 100839-L

Slipstream Fins are made with monoprene creating a lightweight but high performance fin. Made with a spring heel strap, Slipstream Fins give divers an easy donning fin that will also "deliver the goods" in any condition. The light weight helps to keep the divers legs in optimal position when a low-silting kick is necessary and is also optimal for divers reduce damage while working around sensitive marine areas like coral reefs.

Slipstream fins are delivered with Spring Heel Strap, made in stainless steel. Automatically adjust to the diver's feet. Compensates for depth and compression of boot material. Unbreakable strap provides an amazing degree of comfort and peace of mind. Stainless steel main spring and safety cable wrapped in durable fabric.
