

Kask Plasma AQ

Reference#

VENTILATION Maximum ventilation thanks to the ten air intakes. The air intakes and the internal outflow channels guarantee effective breathability.

LAMP CLIPS Helmet equipped with strong nylon external luminescent lamp carrying clips, compatible with all headlamps with elastic bands on the market.

AIR GRID The air intakes are equipped with an anti-intrusion grille, that prevents entry of debris whilst maintaining breathability.

CHINSTRAP EN 397 Four point chinstrap with Quick release fastening and opening in conformity with EN 397. Provided with lateral divider for adjusting the length of the straps.

RING TO HOOK Fitted with a special loop on the chin strap which allows the helmet to be connected to the harness.

SANITIZED® The Sanitized® treatment is an antibacterial treatment that acts as an internal deodorant counteracting the development of unpleasant odors. Thanks to its hygienic function it effectively prevents bacterial proliferation by increasing freshness and comfort of the fabric in contact with skin.

2DRY This high-tech and maximum comfort fabric dries very quickly, encouraging the expansion and dispersion of moisture to the outside and leaving a pleasant feeling of freshness.

MICROMETRICAL ADJUSTMENT The micrometrical size regulation mechanism positioned at the rear of the helmet provides quick and precise adjustment, even when wearing gloves.

VISOR ATTACHMENT Provided with attachment for fitting visors. Compatible with all KASK visors.

EARMUFFS FITTING Provided with integrated slot for earmuffs with bayonet attachment.
