

Ascomedic MS Emergency Bag FZ

Reference# 85600

Ascomedic MS Emergency Bag FZ

First Aid emergency blanket. Helping the injured to retain body heat. Wind and waterproof material, FR tested in accordance with LSA-Code requirements for immersion suits. Fitted with full length zipper. Packed in transparent vacuum bag for minimal size.

Developed in collaboration with the Matt Skuse in the Norwegian Society for SeaRescue (NSSR). The bag is equipped with a divisible zipper in the full length of the bag. With four zipper pullers one can open/close where necessary and convenient for the situation. With full-length zipper, the bag has a variety of uses, which are exemplified on the package insert.

Facts

- Designed to keep injured warm and protected against rain, wind and cold
- All seams are taped and watertight
- Inside part of fabric is metallized (laminated) to retain body heat
- Web reinforcement allows injured to be lifted in the bag
- Without sleeves
- Extra long zip - may be folded out completely
- Zipper with four sliders - may be opened/closed where convenient and needed for free airways or access to the patient
- Many alternative user applications - see product leaflet
- May accommodate a mother and small child
- Ascomedic's main fabric is FR-tested according to requirements in Solas' LSA-Code
- Packed in protective vacuum for storage, ensures functionality in emergency
