

SeaBass Fisherman's Work / Flotation Suit

Reference# 85374-99990L

SeaBass

SeaBass is a combined waterproof work and flotation suit for anyone working at sea. It has a built-in inflatable 150N lifejacket that facilitates the correct flotation position if an accident should occur. Inflation of the lifejacket is manually triggered by the user. It can also be inflated using the mouth piece. Good ergonomic design assures freedom of movement. The suit weighs less than 3 kg, which is about the same as regular heavy-duty rainwear. It is made from coated PVC and polyester and is easy to clean off dirt and fish entrails.
