

Flame Resistant Wool Baselayer Set

Reference# 67014-990L

The mixture of merino wool and modacrylic makes the garment flame resistant, thick, durable and well insulating. Loops on the inside help maintain a steady body temperature when working out on the coldest days. The garments are soft and comfortable against the skin. Wool insulates even if wet and resistant to body odor. A garment that is perfect for tough conditions. Can be washed in 60 ° C wool wash.

Composition: 70% Wool (Merino) 30% Modacrylic (Kanecaron)

Fabric weight: 220 g/m²

Wool fiber diameter: 20.5 μ m

Knit: Terry knitted loops inside

TECHNICAL FEATURES:

- Protection against flame - Limited flame spread (EN ISO 15025:2016 Method A)
- Naturally resistant to melting or dripping, inherent. Test report no. 5180506-2 rev.1.
- Color fastness to artificial light (EN ISO 105-B02: 2014): min. 4
- Color fastness to washing (EN ISO 105-C12: 2004): min. 3
- Color fastness to sweat (EN ISO 105-E04: 2013): min. 3
- Color fastness to rubbing (EN ISO 105-X12: 2016): min. 3
- Determination of spirality (ISO 16322-3: 2005, ISO 15797: 2004): Does not exceed 5%
- Determination of dimensional change during washing and drying (ISO 5077: 2007): Max. +/- 8%
- Washing and drying procedures for textile testing (EN ISO 6330: 2012): Wash at 60 °C (6N) - Tumble dryer 50 °C

Product Detail

Material

Wool/modacrylic (70/30) 220 g/m²

Colour

990 Black

Flame Resistance

Limited flame spread EN ISO 15025:2016 Method A

Certificates

ISO 15025
